Objet260 and Objet500

DENTAL SELECTION

The most versatile dental 3D printers on the market.

The Objet260 and Objet500 Dental Selection™ are the only dental 3D printers to run on triple-jetting technology, which is PolyJet™ 3D Printing at its most advanced. They deliver:

- Lifelike color, texture and detail: 3D print rigid and gum-like features in a range of realistic tooth and gum shades.
- Many materials in one job: Build multi-material dental models in one piece, or complete several small models from diverse materials in one unattended job.
- Efficient workflow: Maximize uptime by running your three most-used materials simultaneously.

The Objet260 and Objet500 Dental Selection support all Stratasys dental materials, plus an array of dental-specific palettes to produce lifelike colors and textures for teeth and gums. Create:

- Stone models for implant testing with gum-like texture for accurate functional evaluation
- Models with gum-like materials or a mix of rigid and gum-like components
- Jaw models printed directly from CBCT scan data with high-definition tooth, root and nerve canal anatomy rendered in contrasting materials

Objet260 Dental Selection: Achieve maximum versatility in a compact size.

Objet500 Dental Selection: Get all the capabilities of the Objet260 Dental Selection, plus a larger tray size.

DENTAL SELECTION

Integrate the Dental Selection 3D Printers into your dental or orthodontic lab experience:

Increased productivity and capacity.

- Dramatically cut production time with a 3D printer that can multi-task by building diverse models on one tray and managing multiple materials at once

- Increase unattended run time with less materials changeovers

- Support all open format color intraoral scanners

Realistic accuracy and detail.

- Choose from two support material options: SUP705, which is easily removed with a WaterJet; and SUP706, which is both easily removed by a WaterJet and soluble for automated post-processing and increased geometric freedom to print complex and delicate features and small cavities

- Unprecedented realism in look and feel with lifelike gum textures for precise evaluation

- Wide range of shades for customized color matching

Ease of use.

- No digital design knowledge required

- Clean, quiet process

Environmentally safe dental materials.

- Build models with easy-to-handle materials that pose no biohazard safety or disposal concerns

- Choose biocompatible-approved SUP706 support material for use with other PolyJet biocompatible materials
